

[PATIENT CARD FOR VALPROATE]

Contraception and Pregnancy - What you must know*

- Valproate is an effective medicine for epilepsy and bipolar disorder.
- Valproate can seriously harm an unborn child when taken during pregnancy.
- Always use effective contraception without interruption during the entire duration of treatment with valproate.
- Remember to visit your specialist at least each year.

* This applies to all girls and women using valproate and who could become pregnant
Keep this card safe so you always know what to do.

[PATIENT CARD FOR VALPROATE]

Contraception and Pregnancy - What you must do*

- Read the package leaflet carefully before use.
- Never stop taking valproate unless your doctor tells you to as your condition may become worse.
- If you are thinking about having a baby, do not stop using valproate and contraception before you have talked to your doctor.
- If you think you are pregnant: Schedule an urgent appointment with your doctor.
- Ask your doctor to give you the patient guide.

* This applies to all girls and women using valproate and who could become pregnant
